MENTAL HEALTH AND BEST PRACTICES

ACEs ADVERSE CHILDHOOD EXPERIENCES

The CDC's ACE Study uncovered a stunning link between childhood trauma and the chronic diseases people develop as adults, as well as social and emotional problems.

Adverse Childhood Experiences (ACEs)

- 1. Physical abuse
- 2. Verbal abuse
- 3. Sexual abuse
- 4. Physical neglect
- 5. Emotional neglect
- 6. Parent who is an alcoholic
- 7. A mother who is the victim of domestic violence
- 8. A family member in jail
- 9. Family member diagnosed with a mental illness
- 10. Disappearance of a parent through divorce, death or abandonment

The higher one's ACE score, the higher one's risk of health and social problems. With an ACE score of 4 or more, the risk of disease, social and emotional problems become more serious.

TULSA WORLD SPECIAL REPORT: OKLAHOMA LEADS THE NATION IN

CHILDHOOD TRAUMA
Oklahoma children are not immune from this phenomena. In fact
we are No. 1, according to various nationwide surveys.

A 2017 National Survey of Children's Health conducted by the U.S. Census Bureau found that 30.4% of Oklahoma children had incurred two or more adverse experiences, ranking it No. 1 among other states. Earlier surveys have found Oklahoma children ranked No. 1 in the percentage of children who had suffered four or more adverse experiences.

OJA sent surveys throughout the State to Judges, District Attorneys/Assistant District Attorneys, OJA staff, County Commissioners and juvenile detention operators.

The responses indicate a need for more immediate mental health/substance abuse interventions and treatment

STATE PLAN FOR THE ESTABLISHMENT OF JUVENILE DETENTION SERVICES

The Board of Juvenile Affairs, from monies appropriated for that purpose, shall develop, adopt, and implement a plan for secure juvenile detention services and alternatives to secure detention, to be known as the State Plan for the Establishment of Juvenile Detention Services, which shall provide for the establishment of juvenile detention facilities and services with due regard for appropriate geographical distribution and existing juvenile detention programs operated by statutorily constituted juvenile bureaus.

10A O.S. §2-3-103(D)

BKD PERFORMANCE AUDIT

In December 2018, a Performance Assessment report was completed and published by BKD CPA's and Advisors, at the request of the Agency Performance and Accountability Commission.

The recommendations regarding detention services, specifically "<u>right-sizing</u>" detention capacity, funding alternatives to detention and utilizing an objective evidence-based detention screening tool, will be included within the Statewide Plan for Detention Services revision.

"RIGHT-SIZING" DETENTION CAPACITY

The following formula will be used with variations depending on if use is declining, increasing or holding steady. Projected Need determined by analysis of prior budget cycle (process is described below)

Less

Number of beds used during the prior budget cycle that according to JOLTS data were not eligible for detention

Plus

Adjustment for known changes to the system that will increase bed demand (pending changes in rules and/or law)

Plus

5 to 10% cushion to account for temporary fluctuations as a conservative factor

Less

Adjustment for implementation of alternatives to detention as outlined in the State Detention Plan

Less

Adjustment for youth detained awaiting OJA placement – reallocate funding from detention to therapeutic placements

DETERMINING "PROJECTED NEED"

Process for determining "Projected Need" as used in the above formula

- If prior year demonstrates a decline in need, projected need shall be the average demand of the last 90 days.
- If prior year demonstrates an increase in need, projected need shall be the average demand for the last 30 days plus an escalation of beds by quarter equal to the amount suggested by the statistical slope of the trend line based on a bed utilization time-line plotted in Cartesian coordinates. If need exceeds available capacity and budget, then the normal process of seeking additional resources will be employed.
- If need is relatively stable, then the prior year plan will be continued

FORMULA SUMMARIZED

Projected Need

- unlawful use
- + pending need (law/rule changes)
- + 5 to 10% cushion to account for temporary fluctuations as a conservative factor
- allowance for utilization of alternatives
- average number of beds used for youth waiting placement up to the amount of new therapeutic placements created
- = Number of Fixed Capacity Beds Contracted.
